

# Our 2017 innovations

## Our proven SensaDisc has been upgraded:

- Power supply and data transmission in only one cable
- Simple connection to the SensaDisc with magnetic plug
- Ergonomic design improvements
- LEDs indicate the status of the device
- An new integrated electronic allows to establish an autarcic monitoring network with multiple SensaDiscs

## The all new SensaRack system:

- Integration of all components including the keeping of indicator organisms
- For use even in security relevant settings
- Sensor monitored supervision of a.o. lockable doors, humidity, temperatures
- Presentable design with illuminated SensaDisc, swing out function for easy maintenance
- Well known „Berliner Wasserbetriebe“ are using this equipment to monitor water quality in their main water works
- Reliable, low maintenance, durable
